

mediaJET® Photo Metallic Chrome 250 | Photo paper, metallic high-gloss surface

Product description

Pearlescent photo paper with impressive surface, for exclusive and incomparable advertising and effect photography with metallic look. Depending on the incidence of light and viewing angle, the high-gloss picture surface exerts a magical fascination on the viewer. Absolute top results in the photo output of special motifs with bright, light tones on a high-gloss photo paper.

Specific feature

This incomparable photo paper from the latest generation, enables professional photographers to produce impressive images on an extravagant, metallic paper surface. Colour images are reproduced in a photo-realistic way, with colour fidelity, vivid, dramatic and rich in details. mediaJET Photo Metallic Chrome 250 is a high-quality photo paper for universal deployment on all standard LFP inkjet plotters that use both dye or pigmented inks. The coating of this exceptional photo paper delivers an excellent colour reproduction with high detail-fidelity, sharp contours, an extremely wide colour scope and excellent flatness qualities. The characteristic metallic surface with its very high gloss level that was developed in-house, is reminiscent of traditional Cibachrome or Ilfochrome papers. In the areas of art, fashion, advertising, wedding, product and artistic nude photography, this paper is sure to leave a lasting impression on the viewer.

Processing

To guarantee optimal quality, photo and fine art papers should be stored and processed in a climate with 30-70% relative humidity and at temperatures from 15-30°C. We recommend that the paper be acclimatised in the print room for one day before printing, and to reseal in the original package after printing. Prevent fingerprints on the coated side by wearing clean cotton gloves while processing. Please avoid contact with solvent, glue and softener, leads to yellowing.

Technical specification

Material:	Paper	Colour L:	91,75
Application Area:	only indoor	Colour a:	0,3
Surface:	gloss	Colour b:	-10,1
Specific gravity:	250,00g/m ²	Whiteness (R457):	>125 (D65/10°)
